

MetaWeather

Provides:

This API provides...

A location search and its weather (up to the next 5 days), or the weather of a location on a specific date.

Key Provisioning:

- No key needed

Pain factor (*0=ezipz...5=nightmare*): 

Quotas:

- unlimited
-

The Good:

- Simple
- Displays location and past weather information (including a specific day)
- There is no limit on the number of requests that can be made.
- The JSON response is self-explanatory.

The Bad:

- Needs a woeid (Where On Earth ID) for location so you need to search for location first to get its woeid

The Ugly:

- ...
