Collected Knowledge & Wisdom on

REST Countries

Provides:

This API provides in depth information on countries around the world. The information provided includes the name of the country, the capital of the country, the currency used, the timezone the country in, language spoken, and much more.

Key Provisioning:

Pain factor (*0=ezpz...5=nightmare*): **1**

- No key is required to access the RESTful API.

Quotas:

- None

The Good:

- There are many different routes that an user can use to search for a country.
- The documentation is very clear in explaining the different routes that can be used to search for a country and even provides an example along side the explanation.
- The API contains very thorough information on every country.
- It allows the user to filter the output of the search based on the specified fields given by the user.

The Bad:

- May get a bit confusing and overwhelming when the search returns multiple countries.
- Indexing of the info is a little unclear. Requires a bit of testing to figure out.

The Ugly:

- None
