Collected Knowledge & Wisdom on the

UN Data API

Provides:

This API provides information on growth, pollution, and health indicators that the UN uses to assess the state of affairs in certain regions.

Key Provisioning: **Pain factor** (*0=ezpz...5=nightmare*): **_3.5_**

- A key is not required, a request can be made without any special provisions.

Quotas:

- N/A

The Good:

- A free, accessible source of data collected and put together by one of the most respected and relevant organizations in the world

The Bad:

- The documentation is lacking, and written in poor english, making it very difficult for an English speaker to understand how to use this API.

The Ugly:

- It's difficult to understand how to use this API with its limited documentation, and default XML output.
